

Claims and Forms Tools

Affordable Solutions to Fit Your Practice

Fast, Easy Insurance Claim Form Printing

Just Claims[®]

Paper Claims. Plain & Simple.

Just Claims software helps medical practices complete preprinted insurance claim forms. Just Claims displays a familiar insurance claim form for entering changes. Just complete the form as you would a standard claim form. With a single click of the mouse, your forms can be printed!

Just Claims can automatically store patient name, address, policy information and more for recall at a later time, simply by selecting from a list of patient names stored within Just Claims. Just Claims is available in two editions depending on the claim form needed. Choose either HCFA-1500 or UB-92 forms editions.

Create Professional-Looking Documents

Final Draft word processor helps you create professional-looking healthcare documents and enhance your medical practice's image.

- Instantly create documents for your office such as form letters with the easy-to-use Letter Wizard to customize a form letter for one patient or a group of patients.
- Merge data from Medisoft Version 11 into your document to save time.
- Enables you to check for spelling errors using the built-in healthcare dictionary.
- Use with Medisoft Version 11 for extended patient notes. When you are in a patient's note within Medisoft, you can click the Final Draft icon to open a Final Draft document unique to that patient, then add any many notes to this document as needed.
- Use Final Draft to create birthday notes, referral letters, payment due notices and chart notes.
- Design templates for documents frequently used in your office.
- Use the 100 sample healthcare-related document templates included in Final Draft to help you get started.
